PROFESSIONAL SUMMARY

Program management professional with 6+ years delivering cross-border operations programmes across the US, UK, Canada, the Middle East and India. Currently owns end-to-end delivery for a new business line at Uber AI Solutions serving a Fortune 10 technology client, scaled from 31 to 165 active specialists across 30 concurrent workstreams. Designs operating models and then automates them — built the programme's nine-gate control framework from zero, diagnosed and reattributed its delivery latency problem, and led the LLM-based automation programme that reduced cost of operations by 70%. Authored the transformation roadmap now being delivered by the data science organisation.

PROFESSIONAL EXPERIENCE

Uber AI Solutions Hyderabad, India *Program Lead — AI Operations Sept 2025 – Present Engaged via vendor delivery partner*

- **Designed the operating model for a new business line from zero** — nine control gates, 40+ controls, named owners and documented decision rules at every stage — adopted as the programme's canonical specification by Uber senior leadership, the data science organisation and client leadership.
- **Reattributed a delivery-latency escalation using funnel instrumentation.** The client attributed an 11-day cycle time to delivery underperformance; stage-level analysis isolated **7 of 11 days as client-side scheduling**, converting a vendor performance dispute into a joint two-sided SLA redesign.
- **Led AI-enabled process transformation**, replacing manual review, requirement matching and integrity validation with LLM in-the-loop pipelines built on Google Apps Script and a hosted Claude API — contributing to a **70% reduction in cost of operations**.
- **Delivered a current-state assessment and transformation roadmap** to the data science organisation: nine instrumentation gaps severity-rated and sequenced by commercial risk, plus a nine-priority build brief for a self-serve client platform — now the basis of the productisation programme.
- **Scaled delivery from 31 to 165 active specialists across 30 concurrent workstreams**, operating a 54-line requirements register with three-tier commercial banding, gating criteria and target fulfilment dates per workstream. • **Final quality gate for a six-person delivery pod** — all output routes through this role for review before reaching the program manager or the client.
- **Re-engineered a failing requirement rather than its execution.** Identified that a workstream staffed at 15–20 years' seniority was mismatched to work performable at 1–2 years; rebuilt the specification and reset intake, correcting both cost-to-serve and fill rate.
- **Validated an automated evaluation tool before adoption**, benchmarking machine scores against human-selected outcomes, establishing confidence bands and a manual-review zone, and identifying false negatives in the aggregate score — preventing an unvalidated system from becoming a decision gate.
- **Benchmarked cycle time against AI-first competitors** and sized the automation required to move from an 11-day cycle to the client's sub-24-hour SLA target.

Meedad IMC Remote (Kuwait) *Operations & Delivery Lead May 2024 – Sept 2025*

- **Ran end-to-end resource and capacity operations for enterprise clients across North America, Australia and the Middle East.**
 - **Delivered 40+ strategic placements and contract deployments** within a six-month window, directly enabling client-side scale-up.
 - **Rebuilt the cross-continental delivery pipeline** in partnership with business unit heads, **reducing turnaround time by 15 days**.
 - **Standardised cross-border compliance documentation** across multiple jurisdictions, cutting documentation error rates by **20%**.

Vialto Partners Toronto, ON, Canada *Engagement Support Specialist — Transitions & Compliance Jan 2024 – May 2024*
Global mobility and cross-border tax practice divested from PwC

- **Managed global transition tracking and international compliance configuration** for 50+ corporate assignees across North America.

- **Automated tracking of cross-border documentation and regulatory checkpoints**, sustaining **100% audit accuracy**.
- **Primary point of contact for priority enterprise accounts**; raised engagement satisfaction by **20%**.

LeafFilter London, ON, Canada *Field Operations Representative May 2023 – Dec 2023 Concurrent with postgraduate study*

- **Built real-time pipeline tracking integrated with internal CRM**, improving workflow data accuracy by 20%; ran stakeholder consultations and account reconciliation.

ANSR Hyderabad, India *Process Integration Analyst — GCC Build & Operations Aug 2022 – Apr 2023*

- **Supported offshore Global Capability Centre (GCC) establishment** for global consulting and technology enterprises entering the India market.
- **Ran full-cycle onboarding and process integration for 100+ roles annually**, reducing cycle time by **25%**.

Global Visas Ltd Hyderabad, India *Operations & Compliance Manager Jun 2021 – Jul 2022*

- **Managed international compliance, cross-border payroll setup and transition frameworks** for 70+ overseas assignees in line with multi-jurisdiction regulation.
- **Restructured compliance data controls**, reducing workflow latency by **40%**.

CORE SKILLS

Program & Delivery Management: Operating-model design · End-to-end programme delivery · Cross-functional delivery leadership · Executive and client stakeholder management · SLA design and two-sided latency attribution · Capacity and workstream planning · Risk and dependency management

AI-Enabled Operations: LLM-in-the-loop workflow automation · Human-in-the-loop system design · Prompt engineering with anti-fabrication guardrails · Decision thresholds and routing logic · Google Apps Script · Claude API · Google Workspace APIs · Structured JSON schemas · Integrity and anomaly detection

Analysis & Instrumentation: Root-cause and bottleneck analysis · Funnel and cycle-time instrumentation · Competitive benchmarking · Unit economics and cost-to-serve · Requirements engineering · Delivery telemetry and reporting · Advanced Excel / Google Sheets modelling

Governance & Compliance: Control framework design · Audit-ready evidence standards · Cross-border regulatory compliance · Contractor classification (1099) · Background verification and work-eligibility governance · Data quality controls · Jira

EDUCATION

Fanshawe College London, ON, Canada *Post-Graduate Certificate, Business Management Dec 2023*

Kakatiya University Hyderabad, India *Bachelor of Business Administration (BBA) May 2021*
